

Powerway® Engineering Advantage Engineering Viewer

Powerway Engineering Viewer provides the ability to print, view and mark-up a drawing on a workstation not running the native application.

- Allows viewing vector-based file formats, drawings and CAD/CAM engineering files (non-RASTOR-based formats).

- Manages mark-up capability and maintains a mark-up history.

- Allows printing portions of a drawing or enlarged views.

- Can also view output files such as HPGL, IGES, DXF and more.

- Expands the viewing capability of the Powerway Desktop to approximately 200 file formats.

Many manufacturing and engineering organizations use multiple Computer-Aided-Design (CAD) systems that produce their engineering drawings and files. Often those CAD systems are proprietary, expensive, and on computer systems that are not readily available to other departments like sales and manufacturing. For these reasons, many organizations still distribute paper copies of their documents. Even those that have implemented CAD viewers on employee computer systems have found very little integration into distribution management, incompatibility to all of a company's CAD file formats, and an unacceptable level of document lifecycle control.

Powerway solves this problem with the Powerway Engineering Viewer.

Additionally, our deployment and integration services teams can provide the expertise to implement a CAD distribution and viewing strategy that meets your specific requirements.

POWERWAY™
Suite 2000

Powerway® Engineering Advantage Engineering Viewer

Powerway Suite 2000

Powerway Engineering Viewer is one of the modules that make up Powerway Suite 2000. From design through production, Powerway Suite 2000 automates paper-intensive engineering, quality and manufacturing processes, helping you reduce costs, improve quality and speed time to market. Powerway software is designed to work together to provide complete paperless document and data control, advanced quality planning, integrated quality management, and real-time factory floor data collection for optimum business process performance. Using Suite 2000, you can bring the entire organization together to overcome the problems caused by a lack of communication and collaboration such as late engineering changes, customer complaints, product quality issues, scrap and rework, and lost sales. Powerway supports its industry-leading software solutions with a full range of professional services including consulting, deployment, integration and training.

For more information about how Powerway software and professional services can help your organization streamline and control business standards and regulatory compliance programs, visit our website at www.powerwayinc.com, email us at info@powerwayinc.com, or call 800-964-9004.
