

SPEC-ADV: Converting Specifications to IntelliDocs® - Advanced Techniques

Course Description:

Converting Specifications to IntelliDocs® consists of 2 two-hour sessions (4 hours total) for engineering personnel involved in the ownership and application of specification requirements to part drawings. The discussion is geared for individuals who are deeply involved in the authoring of requirements documents in IntelliDoc format and wish to hone their skills further as a benefit for themselves and their organization.

Course Objective:

By the end of the course, each participant will understand, at a deeper level, the authoring principles presented and be able to apply them and help other individuals in their organization to create IntelliDocs.

Course Outline:

- [AND] and [OR] logic
- Driving the type of reporting you desire
- Spec Application (Global vs. Specific)
- Spec Advisors
- Spec References
- Purposes- FAI, Special Processes, RFQ, PO, Full, Production Planning
- Domain Library
- Representation of tables
- Embedding Best Practices
- Review and testing of IntelliDocs

Activities and Assessment:

Participants will be given a brief overview of the spec authoring process (review of Basic Course) and then move on to more advanced concepts. These things will be applied by the trainer so that participants can see how these things can be applied practically. Questions related to this activity can be submitted through the webinar software and will be answered during the last portion of each of the two-hour periods. Additional support resources will be described so that all participants know who to contact and what Powerway-provided training, FAQs and white papers are available.

Course Prerequisites:

Prerequisite: Registrant must have taken the SPEC course. Spec Studio loaded on participant's PC.

Course Materials:

Course handouts include an IntelliDoc Advanced Authoring Quick Reference Guide.

Course Cost:

\$300 USD per person
